

Fukushima City Onsen Safety (Takayu, Tsuchiyu, Iizaka) ~ Azumayama Volcanic Warning Level ~

On Saturday September 15 at 1:00 pm the Volcanic Warning for Azumayama was raised from Level 1 (Potential for increased activity) to Level 2 (Do not approach the crater).

A Level 2 Volcanic Warning means there is a possibility for volcanic materials to be ejected within a radius of 1.5 km around the crater. There is now restricted access to the area around the crater.

The areas of Takayu Onsen, Tsuchiyu Onsen (including Tsuchiyu Onsen Pass), and Iizaka Onsen are well outside the 1.5 km restricted access area. There is no reason to be concerned for your safety when visiting these onsen areas.

Distance from Main Crater
